Suggested Repertoire for the James Campbell I
Multi-Percussion Mallets

Suggested Repertoire for the Innovative Percussion James Campbell Multi-Percussion Mallets

This list of suggested repertoire for the James Campbell Multi-Percussion Mallets has been compiled by Eric Willie and James Campbell.

The JC-1M (Soft) and JC-2M (Hard) signature model multi-percussion mallets are designed to the specifications of James Campbell, Professor of Music and Director of Percussion Studies at the University of Kentucky, and Principal Percussionist with the Lexington Philharmonic Orchestra. Jim's sticks are specifically designed for multiple percussion and percussion ensemble works, where a single implement must be used on an assortment of percussion instruments. Constructed of heartwood hickory, these sticks feature our unique and innovative "fulcrum notch" creating a drumstick-like feel and balance. Both models feature cores of wood with latex, covered in a high quality chamois.

PIECE	COMPOSER	SUGGESTED JAMES CAMPBELL MULTI-PERCUSSION Mallet
